Specifications:

A fool-proof **Access Control System** with economical, Fast, Accurate and reliable Fingerprint sensor that ensures access to users only when their live finger matches the stored finger template.

Employee simply places finger on fingerprint sensor for an instantaneous **comparison of live finger with the stored finger template**. Upon successful verification, access is granted or rejected with a beep and visual indication. This restricts unwanted employee movements and prevents unauthorized entrants. Quick, Simple and easy to install, suitable for all types of organizations.

Features:-

- ✓ Fingerprint based Access Control Reader suitable for any organization.
- ✓ Unique 1:N Identification algorithm eliminates the need to key in the user-ID
- ✓ 1000 fingerprint templates can be stored in the unit.
- ✓ Standalone device does not need a Computer to enroll or function.
- ✓ Indicates Permit / Restrict action by audio visual indicators
- ✓ Outstanding and fast matching algorithm delivers accurate Identification / Verification.
- ✓ In-built relay activates Electric Strike / Electro Magnetic Lock / Electric Latch / CCTV Camera, Alarms / Other electronics devices.

- ✓ Sleek and easy to operate unit with tough enclosure and enroll keys. Dimensions: 80mm X 180mm X 35mm.
- ✓ Ideal for CEO's cabin, Server Rooms, Storage Rooms, Strong Rooms, warehouses and many other places.
- ✓ Virtually Zero Maintenance System.
