Face Recognition Attendance Device

Key Features:

- The face recognition time attendance system uses our own patented and advanced facial image +V4.0 recognition algorithm for fast operation speed and user's security.

- It features high recognition accuracy and fast speed with the recognition rate more than 99 %, false acceptance rate (FAR) less than 0.1% and recognition speed lower than1s.

- This product has excellent light adaptability. The intelligent self-learning function makes it free of the influences of glasses, hair style, age, and other small changes of face.

- The 2.8 inch color touch screen is characterized by 320×240 resolution and supports TCP/IP and USB communication interfaces.

Specifications:

- ✓ Face Capacity: 400 /500(1:N)
- ✓ ID Card Capacity: 10,000
- ✓ Transaction Storage : 1,00,000
- ✓ Camera : High Resolution Infrared Camera
- ✓ Communications: RS232 ,RS485, TCP/IP ,USB
- ✓ Power Supply: 12V DC ,3A
- ✓ Battery Extra
- ✓ Extend Face capacity

- ➢ Free Hardware and Software Support

- ➢ 1 Year Hardware Warranty

Company Profile

Introduction

        Explore a world of wide-ranging industry Services aimed at making your business more productive and profitable. Cherish the experience of working with dedicated professionals. Nurture an association based on trust and mutual respect.

        Our specialty solutions and services enable you to focus on your core domain. Offload your non-core tasks to us; now enjoy better cost control, greater resource optimization and improved customer relationship.
